 Silivri, Istanbul

ABOUT ME

I am a curious and open-minded young person who has integrated software into his life and tries to solve the problems he encounters with algorithms. I am trying to improve myself in the fields of backend, frontend and database, I do my best to reach my goals.

JOBS - PROJECTS

PHP DEVELOPER

Yenimedia Electronic Publishing / Istanbul / June 2022 -

- As PHP Developer, I work in the fields of back-end, front-end and database on the international wholesale site Pallet Grid. I gain experience on all software processes and e-commerce conversions in an e-commerce site. I am doing front-end developments on the Arnasmart.com e-commerce site.

INTERN PYTHON DEVELOPER

Habermetre / Istanbul / February 2022 - June 2022

- I worked on the collection of news on the internet using the Python programming language at the News Analysis and Reporting company within Yenimedia Electronic Publishing.

THESIS

Duzce University / Duzce / December 2021

- I collected Twitter data with the Python programming language and then performed sentiment analysis on that data using artificial intelligence libraries.

INTERN MOBILE DEVELOPER

Gamelab Istanbul / Istanbul / June 2020 - September 2020

- I contributed to the development of a football game called TASO 3D with Android Studio.
