---

ABOUT ME

An inquisitive and open-minded young individual, who has seamlessly integrated software into daily life, striving to solve problems using algorithms. Endeavoring to enhance skills in backend, frontend, and database domains, putting forth their best effort to achieve defined goals.

JOBS - PROJECTS

PHP DEVELOPER

Yenimedia Electronic Publishing / Istanbul / June 2022 -

- As a PHP Developer at the international wholesale platform Pallet Grid, my responsibilities encompass back-end, front-end, and database work. I am gaining experience in establishing all software processes and e-commerce conversions for a retail site. Additionally, I contribute to front-end developments on the e-commerce platform Arnasmarket.com.

INTERN PYTHON DEVELOPER

Habermetre / Istanbul / February 2022 - June 2022

- At the News Analysis and Reporting company under Yenimedya Electronic Publishing, work involved utilizing the Python programming language for web news collection.

THESIS

Duzce University / Duzce / December 2021

- Utilizing the Python programming language, Twitter data was collected and subsequently subjected to sentiment analysis using artificial intelligence libraries.

INTERN MOBILE DEVELOPER

Gamelab Istanbul / Istanbul / June 2020 - September 2020

- Contributed to the development of a soccer game named TASO 3D using Android Studio.
